BIOS FOR CANDIDATES FOR BOARD, 2020

BIO for Jordan Epperson: I was born and raised here in Hawaiian Acres and have spent most of my adult life here as well. With so much time spent here and no real plans to leave anytime soon, I feel that contributing a little of my time and energy to our roads will greatly improve our lives and transportation needs in the acres. As my first full term on the HARC board is nearing its end I realize that I'm really just now getting to understand how the board works and operates, I would like to continue serving this neighborhood by continuing to make improvements to our roads and the corporation that supports them. I ask for everyone to please consider re-electing me to be on the HARC board for 2020.

BIO for Geneva Jackson: I have lived in Hawaiian Acres for 5 years and the roads have become my passion. I was appointed as Vice President of HARC in 2018 to fill a vacancy for this position. As one of the 5 volunteers willing to be on the board for 2019, I was voted in as President and I have worked hard doing HARC office work, organizing to enhance and update HARC's policies and procedures. I also have driven every square mile of all of Hawaiian Acres roads and know where the problem areas lie, and I physically work to fill potholes on many of our roads when material is available. I wish to continue as one of the board members to make more progress in establishing our procedures, soliciting more volunteers, and ensuring our roads are maintained in the best possible manner, considering the funds that we receive.

BIO for Graceson Ghen: I have lived in Hawaiian Acres for 8 years and grew up in the Puna District. I have been Road D representative for a couple of years and was approved as a Director on the board for 2019. I will do my part to ensure that HARC is able to continue doing its best to provide annual maintenance to our community's roads.

BIO for Kaipo Dye: My goal in being on the HARC board is to contribute to our Hawaiian Acres community. I want to ensure competent leadership in HARC and know I can help in this regard because of my participation on various boards and my knowledge of running my own business. I am an agricultural tech and college lecturer with a Masters in Environmental Engineering & Modeling. I am a competence specialist in regard to organizational protocols and operations with sensitivities to cultural diversity.
