

Aloha Everyone

This first quarter of 2017 has gotten, I believe, off to a good start. The Board has worked hard to provide the most cost efficient service to the community. Things we have collectively accomplished are:

Quickbooks – We have completely streamlined the accounting system to make the process of handling the income and expenses more user friendly. This change also allows for complete transparency in showing where each dollar received is spent. The residents can actually see that the dues they have paid are going to the road they travel on the most.

Road Representative Log Sheets - Each Road Representative now fills out a log showing all the work they accomplished on their road during each quarter. These road logs, one for each letter road, will be posted on the website at the end of each quarter and also available at the HACA office at the HARC desk. The log shows what was done, the value, who performed the work and how much it actually cost the residents. All volunteer work is posted on the log as well

Website - We have been updating the website with all the information regarding meeting minutes, road work logs, financial statements, agendas for the next meetings, newsletters, and other pertinent items. We want the residents to have all the information they may be interested in regarding HARC readily available to them in real time.

It is the HARC Board's top priority to provide the residents with the best services for the money they have donated.

Mahalo,

Deborah Beaver
